

Syllabus

Course: CFRS 764: Mac Forensics

Instructor: Ryan L. Chapin

Email: rchapin@gmu.edu

Class Meetings: Wednesday, 4:30 - 7:10, Robinson Hall A - Room 352

Office Hours: By appointment

Required Materials: *(The following items are not required until Week 3)*

250GB+ USB 3.0/FW 800 - [Example](#)

8GB+ USB Flash Drive

iCloud Account - <https://www.icloud.com>

MacOS X License - [Link](#) (Wait until class to download, unless you already have it)

Additional written materials will be provided by the instructor and disseminated via Blackboard

Optional:

Mac OS X, iPod, and iPhone Forensic Analysis DVD Toolkit; ISBN-10:1597492973

Mac Computer: i5 with 8GB of RAM and 500GB HDD (Lab computers will be available)

Description: Presents students with the concepts, tools, and techniques used for forensic analysis of the Macintosh based computers and iOS devices (iPhone, iPad, iPod). Students will learn digital best practices for working with Mac and iOS, be able to successfully recognize the HW and its evidentiary value, and locate/analyze artifacts of interest. Hands-on exercises will be included.

Course will consist of exercises conducted in a lab environment with concurrent lectures

Objectives: This course will present students with the basic tools and techniques used to conduct a Mac and iOS forensic analysis. Students will apply industry best practices to both the collection and subsequent analysis of Mac and iOS systems with an emphasis on hands-on exercises using currently available open-source and commercial tools.

Tentative Course Schedule:

Overview Week 1 - 27 August 2014

Course Overview/Administrative Items; History

Overview of course presented, syllabus reviewed, administrative items discussed. Topic of discussion will include the history of Mac forensics.

Week 2 - 03 September 2014

Recognizing the Hardware

Topics of discussion will include recognizing the Apple HW and understanding use scenarios.

Week 3 - 10 September 2014

Mac Analysis - Setup

Topics of discussion will include recognizing hardware needs, setting up and configuring a Mac to conduct forensic analysis to include file system makeup and the tools to be used.

Week 4 - 17 September 2014

Understanding Live and Dead Imaging

Topics of discussion will include understanding live & dead imaging processes (tools and techniques), automated imaging and acquisition, verifying and safely mounting forensic images as they pertain to the Mac environment.

Week 5 - 24 September 2014

Mac and iOS Incident Response & Imaging

Students will be challenged with hands-on collection and imaging of Mac data.

Week 6 - 01 October 2014

Loading and Validating an Image

Students will learn how to and the necessity of properly validating of an image and the loading and parsing of an image.

Week 7 - 08 October 2014

Mid-Term Exam

Mid-Term Exam will be administered in class.

Week 8 - 15 October 2014

Users Directory Artifacts Analysis (Part 1)

Students will learn how to identify user generated artifacts and properly identify and analyze these evidentiary items.

Week 9 - 22 October 2014

Users Directory Artifacts Analysis (Part 2)

Students will learn how to identify user generated artifacts and properly identify and analyze these evidentiary items.

Week 10 - 29 October 2014

System Artifacts Analysis

Student will learn how to properly identify and analyze system generated artifacts.

Week 11 - 05 November 2014

Application Artifacts Analysis (Part 1)

Students will learn how to identify application generated artifacts and properly identify and analyze these evidentiary items.

Week 12 - 12 November 2014

Application Artifacts Analysis (Part 2)

Students will learn how to identify application generated artifacts and properly identify and analyze these evidentiary items.

Week 13 - 19 November 2014

Unallocated Space Analysis

Students will learn how to properly identify unallocated space, analyze unallocated space, and identify artifacts of evidentiary interest.

Thanksgiving Break - 26 November 2014

Weeks 14 - 03 December 2014

The Future of Mac Forensics

Students will look at where the Mac industry is going and the forensic challenges associated with this evolution.

Week 15 - 10 December 2014

Final Exam

Final Exam will be administered in class.
