

George Mason University
CFRS 730-001: Deep Packet Inspection
CRN: 18910
Jan 30, 2018 - May 15, 2018
Nguyen Engineering Building 5358, Tuesdays 7:20 - 10:00

Instructor

Jennifer Deavers
jdeavers@gmu.edu
Office Hours: Available upon request

Description

This course will familiarize students with network forensics. Students will identify data that can be retrieved from packets. Students will correlate data. Students will apply industry best practices to evidence collection and analysis with hands-on exercises using current tools. Student should be ready to perform the majority of their work in a terminal command line environment.

Learning Objectives

Upon completing the course, students will be able to:

- Analyze data retrieved from network packet capture data using command line tools
- Select and configure various open-source tools for live and network forensics analysis and utilise these tools for network investigation
- Develop and practice an advanced knowledge of key live and network forensic principles and methods
- Comprehend common threats and vulnerabilities to which a network may be exposed

Grading

Tool Share: 25%
Midterm: 25%
PCAP Challenge: 25%
Final: 25%
Total: 100%

Tool Share

The class will consist of a tool share. The tool share project will include an analytic paper detailing your analysis on several command line protocol or traffic analysis tools. A short presentation detailing the results of your analysis and demonstrating your assigned tools will also be a requirement. The report and presentation are both due on the assigned class week. Fifty percent (50%) of the tool share grade will come from the presentation material (delivery and content) fifty percent (50%) will come from the demonstration. Tool Share pairs or even trios give the opportunity to compare possibly similar tools to one another. Tool pairs or trios should have a similar function in some way.

Tool Share Pairs/Trios		
tcpdump	tshark	
chopshop	dshell	
fiddler	burp suite	Web Scarb
Xplico	Network Miner	
chaos reader	tcpextract	xplico
nftracker	tcpflow	
tcptrace	tcpick	
Bro	snort	
SiLK	argus	
Justsniffer	netdude	
dsniff - URLSnarf	Httpry	
Tstat	Etherape	
Look at tool pairs on SecTools.Org: Top 125 Network Security Tools for more ideas http://sectools.org/		
Look at tool pairs on the Security Onion wiki for more ideas http://www.forensicswiki.org/wiki/Security_onion		

Midterm

A midterm exam will be given during week seven and will cover information provided during lectures, required and supplemental readings, and any information derived from the tool share presentations and demonstrations.

PCAP Challenge

Most classes will include a PCAP challenge. The purpose of the PCAP challenge is to hone your command line skills. A PCAP file will be released during class, with associated challenge questions. The challenge can be completed separately or with a partner. Utilize tools from the tool share or from command line recipes. The PCAP challenge will be started during class, the answers should be submitted individually on Blackboard before the start of the following class.

Software Requirements

Students are to bring the following materials to class:

- Laptops with VMware, VM Fusion, or VMplayer
- Kali Linux - <http://www.kali.org/downloads/>

Textbook

Title: Network Forensics: Tracking Hackers through Cyberspace

Author: Sherri Davidoff, Jonathan Ham

Publisher: Prentice Hall

ISBN 10: 0132564718

Supplemental Materials

<http://packetlife.net> - [Cheat Sheets and Sample Packet Captures]

<http://packetstormsecurity.com/>

Class Attendance

Attendance is mandatory. A number of classes will involve the hands-on use of forensics tools, which will be used in the classroom. In the event that a student cannot attend class due to an emergency or crisis, the student is to contact the instructor as soon as possible.

Disability Accommodations

If you have a documented learning disability or other condition that may affect academic performance you should: 1) make sure this documentation is on file with Office of Disability Services (SUB I, Rm. 4205; 993-2474; <http://ods.gmu.edu>) to determine the accommodations you need; and 2) talk with me to discuss your accommodation needs.

Responsible Use of Computing Policy

Use of computer equipment, including Internet connections within the classroom will be conducted in accordance with the University's Responsible Use of Computing (RUC) Policy.

This applies to all academic and operational departments and offices at all university locations owned or leased. The policies and procedures provided herein apply to all Mason faculty, staff, students, visitors, and contractors.

The university provides and maintains general computing services, including web and Internet resources, and telecommunication technology to support the education, research, and work of its faculty, staff, and students. At the same time, Mason wishes to protect all users' rights to an open exchange of ideas and information. This policy sets forth the responsibilities of each member of the Mason community in preserving the security, confidentiality, availability, and integrity of Mason computing resources. To accomplish these ends, this policy supports investigations of complaints involving Mason computing abuse, including sexual harassment, honor code, federal, state, applicable industry, and local law violations.

University faculty and staff members, as state employees, are subject to the Freedom of Information Act, §2.2-3700, et seq., of the Code of Virginia, and all applicable state and federal rules and regulations. While this policy endeavors to maintain user confidentiality, it cannot create, nor should faculty or staff members presume, any expectation of privacy.

Violations of this policy may result in revocation of access, suspension of accounts, disciplinary action, or prosecution. Evidence of illegal activity will be turned over to the appropriate authorities. It is the responsibility of all users of Mason computing resources to read and follow this policy and all applicable laws and procedures (user sign-on agreement).

For more information regarding the RUC Policy, consult the student handbook.

Communications

Communication on issues relating to the individual student should be conducted using email. Email messages from the Instructor to all class members will be sent to students' GMU email addresses if you use another email account as your primary address, you should forward your GMU email to that account.

Key Dates - <https://studentaccounts.gmu.edu/calendars/#spring>

Calendars (Spring 2018), Semester Calendar	
Spring 2018	Date
Martin Luther King Day (no classes)	January 15
First day of classes; last day to submit Domicile Reclassification Application; full semester waitlists removed	January 22
Payment Due Date	January 22
Last day to drop with no tuition penalty	January 29
Last day to add classes - all individualized section forms due	January 29
Last day Third Party Billing Authorizations accepted	February 5
Last day to drop with a 33% tuition penalty	February 12
Final Drop Deadline Last day to drop with a 67% tuition penalty	February 23
Immunization Record Deadline	March 1
Midterm progress reporting period (100-200 level classes) — grades available via Patriot Web	February 19 - March 23
Selective Withdrawal Period (undergraduate students only)	February 26 - March 30
Spring Break	March 12 - March 18
Dissertation/Thesis Deadline	May 4
Last day of classes	May 5
Reading Days	May 7 - May 8
Exam Period (beginning at 7:30 am)	May 9 - May 16
Commencement	May 18
Degree Conferral Date	May 19

Week	Date	Tools or Topics	Readings	Due Date
1	01/30/2018	Introduction	Tracking Hackers - Chapter 1	
2	02/06/2018	Evidence, Network Evidence Sources, OSI Model, Linux Commands, Ports	Tracking Hackers - Chapter 2	
3	02/13/2018	Tool Share Schedule Logistics Bpf filters Review of PC1		PC 1
4	02/20/2018	In Class -- Malware detonation Lab	Tracking Hackers - Chapter 3	PC 2
5	02/27/2018	PCAP 3, Review Netflow, Argus	Tracking Hackers - Chapter 4 && 5	PC 3
6	03/06/2018	Midterm Review		
7	03/13/2018	CLASS DOES NOT MEET		
8	03/20/2018	Midterm		
9	03/27/2018	Guest Speaker (Hunting in Virus Total, Passive Total, and Domain Tools)		PC 4
10	04/03/2018	Review PCAP 4 and 5 Challenges Start on Violent Python Chapter 4	Violent Python Chapter 4 - Network Traffic Analysis with Python	PC 5
11	04/10/2018	Continue Python Chapter 4	Supplemental reading	PC 6
12	04/17/2018	Tool Share	Supplemental reading	PC 7
13	04/24/2018	Tool Share	Supplemental reading	PC 8
14	05/01/2018	Tool Share	Chapter 10	PC 9
15	05/08/2018	Tool Share		
16	05/15/2018	Final Due @ 7:00 - CLASS DOES NOT MEET	FINAL RELEASED ON BLACKBOARD	

*****This schedule is subject to revision before and during this course*****
